PROFILE

Early-career AI engineer and technical support lead working with medical information systems. I use LLM assistants to build internal automation and combine workflow analysis with hands-on troubleshooting of logs, SQL, APIs, and JSON.

EXPERIENCE

Head of Technical Support

Giasoft LLC | January 2025 - present

- Lead the medical information system support team, prioritize tasks, coordinate responsibilities, and review fixes in Jira.
- Implement the system in clinics, configure modules and integrations, gather requirements, and train users.
- Investigate incidents using logs, PostgreSQL queries, Postman, APIs, and JSON.
- Introduced Claude and ChatGPT into department workflows and built AI-assisted tools for HTML print forms and JSON medical protocols.

Technical Support & Implementation Specialist

Giasoft LLC | December 2024 - December 2025

- Supported clinic staff, analyzed logs and database issues, and reported defects to developers.
- Helped implement the system and train users; appointed Head of Technical Support in January 2025.

Content Moderator

KazanExpress | July 2024 - October 2024

- Moderated marketplace content, worked with Microsoft Office, and prepared reports.

Sales Specialist

Sovcombank | July 2023 - July 2024

- Advised customers by phone, processed applications, maintained CRM records, and prepared reports.
- Mentored new employees during onboarding and day-to-day work.

Insurance Consultant

Ingosstrakh | March 2022 - August 2022

- Issued insurance policies and acquired customers.

Skills & applied automation

Ernest Muzafarov | AI Engineering & Automation

SKILLS

Advanced

Jira / Log analysis / Information system implementation / Requirements gathering and analysis / Development task specification / User training

Intermediate

Working with large volumes of information / Quality control / Analytical thinking / SQL / PostgreSQL / REST API / Postman / JSON / LLMs / AI assistants / Team management / Process automation

Basic

HTML / Git

AI tools used in daily work

Claude / ChatGPT / Qwen / DeepSeek / Kimi / GLM

Additional automation tools

Python / Excel automation / Word document processing

SELECTED AUTOMATION WORK

Price list import

Transforms an Excel price list into categories, services and prices with matched IDs.

Approximately 2 hours reduced to 10-15 minutes.

Document import

Converts a completed Word document into importable JSON.

Approximately 40-50 minutes reduced to about 10 minutes.

EDUCATION & LANGUAGES

Bachelor's degree in Information Systems and Technologies

KNRTU-KAI, Kazan | 2024

English - B1
